# DSE0420 2D DECODED SCAN MODULE STATALOGIC

## THE MINIATURE 2D DECODED SCAN MODULE

The DSE0420 is the decoded version of the DE2011-DL ultra-compact high performance 2D imager engine. It is comprised of the DE2011-DL and a decoder board. The scan engine features an exceptionally high-speed sensor which enables image capture at a full 60 frames per second, delivering outstanding motion tolerance.

The scan engine features an outstanding depth-of-field (DOF) reading, a nominal field-of-view, snappy reading and excellent performance on decoding poorly printed bar codes and bar codes displayed on mobile device and computer screens.

Customers can also choose the optional beeper and/or Datalogic's patented 'Green Spot' technology for visual confirmation of a good label read. This is particularly useful for inexperienced users to ensure the code has been successfully read and captured.

#### **EASY INTEGRATION**

The DSE0420 scan module includes Datalogic's snappy, high-performance decoder which can read all common 1D and 2D bar codes. It can be installed into the device as a whole scan module (mounted by a metal bracket), or separately for application environments that have very limited space at the front end. Customers can embed the decoder board at another location and connect it to the scan engine through an industry standard flat cable. The decoder board can be connected to the device's main board through a standard USB flat cable, which supports all USB interfaces such as USB Keyboard, USB HID and USB COM. DSE0420-D connects via a microUSB cable.

With the use of Datalogic remote management software, customers can manage the firmware of the scan module remotely.

## **FEATURES**

- Scan engine can be installed with the decoder board as one module or separately
- Compact size is able to fit into space constrained application environments
- Highly visible center cross with four corner dots aiming system
- Steady white illumination
- Snappy reading performance with high motion tolerance
- Excellent reading of 1D or 2D codes on print or displayed on mobile device or computer screens
- Low power consumption enables longer battery life
- Datalogic's 'Green Spot' technology for visual good-read feedback (optional)
- DSE0420-D Demo Kit available, features a trigger and interface board

## **INDUSTRY-APPLICATIONS**

- OEM Applications
  - Self-Service Kiosks
  - Medical Devices
  - Lottery Terminals
  - All-in-One POS Terminals
  - Access Control Devices
  - Small Wireless Scanning Devices
  - Handheld Terminals and PDAs

#### **DECODING CAPABILITY**

1D / LINEAR CODES

Autodiscriminates all standard 1D codes including GS1 DataBar™ linear codes.
